

PREFER stakeholder feedback session at DIA Europe

On April 16-17th 2018, [PREFER](#) organised a lively and interactive discussion with stakeholders at the DIA Europe meeting in Basel this April. Patient representatives, participants from industry, academia, HTA and regulators appreciated the lively and interactive discussions. The session allowed people outside PREFER to express their thoughts and needs. PREFER received positive, technical, constructive, and critical feedback that will help decide how to conduct preference studies, inform on how results can be used and how recommendations should be developed.

Isabelle Manneh-Vangramberen attended as the **Patient Advisory Group (PAG) Lead** presenting about 'Patients as Collaborators in Research'.
