ECPC COVID-19 Survey updates

ECPC launched the survey '[Mapping EU Member State's response to the COVID-19 pandemic and cancer](#)' earlier this month. For those who have not been able to respond so far, we are extending the deadline until **Mid-September**. We also have uploaded our translations and the survey is now available in **all EU languages**. By clicking [here](#), you will go directly to the survey where you can **select your preferred language** at the top right corner of your screen.

Please see below all the details you will need to complete or help share the survey.

What is the survey for?

Essentially, we would like to map the effect COVID-19 has had on cancer patients and their treatment across Europe. This information will give us an in-depth and wide-reaching view of how cancer patients have been affected during this pandemic and allow us to continue to help support the lives of cancer patients during unprecedented times such as the current pandemic. In turn, with this information, we can:

- **confront policy-makers** and call for **quality and equal access** to treatment for cancer patients **in all countries under all circumstances**.
- see **how disrupted healthcare** correlates with **deteriorated treatment outcomes** and **increased death incidence** in the coming year.
- predict/identify **new advocacy, policy and research topics**

How long does it take?

The survey will take 15 minutes to complete.

I have filled in the survey, how can I help further?

Thank you for completing the survey! You can help us disseminate this further by sharing the survey on social media or retweeting our [survey_posts](#) on Twitter. Please also share among your friends and relatives, we are looking for a broad range of cancer patients undergoing treatment during COVID-19, so the more people we reach the better. You are encouraged to choose your language from the available translations on the drop down menu on the right side of the screen and disseminate the survey in your preferred language.

If you have any questions, please contact paulina.gono@ecpc.org.

We would like to thank you in advance for your participation and dissemination and we look forward to your responses.

Best wishes,

Antonella Cardone, Director and ECPC Team
