DELIVERING THE VISION OF PERSONALISED MEDICINE IN ONCOLOGY ACROSS THE EU

Tuesday, 7 December 2021 (11.00-12.00 CET)

Dear Partners,

We warmly invite you to attend the virtual event *“Delivering the vision of personalised medicine in oncology across the EU”*. The event is directly linked to the implementation of Europe’s Beating Cancer Plan.

One of Europe’s Beating Cancer Plan flagship initiatives is the ‘Cancer Diagnostic and Treatment for All initiative’ – Flagship 6. It aims to leverage genomic technologies to improve cancer diagnosis and treatment and help reduce unequal access to personalised medicine throughout the EU.

To support its successful implementation, a working group of leading experts from the EU oncology community worked through the barriers to the delivery of personalised medicine in the EU and aligned on a vision for the way forward.

This virtual event will serve as the launch of the report with the views and conclusions of the working group: *“Realising the potential of genomic technologies in cancer care: Implementing the ‘Cancer Diagnostic and Treatment for All’ initiative in the EU”*. The report discusses existing gaps and makes recommendations for EU institutions to support access to personalised medicine across the EU. The event will include a multistakeholder
